

I gave XM Radio to my husband for his birthday this year. He does a lot of traveling in rural North Dakota where where we do not receive many stations and those we receive only last a certain distance before we lose them. XM Radio is helping my husband keep informed about currant events while at work. We definitely believe we have a right to have a choice with this product. We are paying for it!

I respectfully urge the FCC to reject the NAB's petition 04-160 and support XM's ability to prvide its services.
